

Supercharging organizations, teams, and people

## Accounting and IT Operations Support Services Overview

### Overview

In the world of remote work, virtual collaboration, and distributed specialization there is no reason for functions that are not core to business to be performed in house when they can just as easily - and more cost effectively - be “right-sourced” to those for whom it is.

Accounting, finance, and IT support operations fall neatly into that category. VX Dynamic is positioned to deliver these support services both efficiently and effectively at a reasonable cost.

### Services

#### Accounting and finance operations

Our accounting team has extensive experience partnering with other organizations to support finance operations including and not limited to:

- Quickbooks administration and management
- Expense management and reimbursement
- Payroll operations
- Hours tracking
- 1099 compliance
- Accounts payable and accounts receivable operations
- Bookkeeping and liaising with CPA for tax preparation
- If desired, support interfacing with a full benefits and payroll services firm, which could lead to superior benefits options for partners and employees

#### IT operations support

Our IT services team operates with 24/7 coverage, with experience supporting technology infrastructure needs for small and mid-sized businesses, including and not limited to:

- IT services management
  - Experience with Microsoft 365 and Google email and calendar infrastructures
  - Experience configuring and supporting Zoom, most CRMs and marketing software, and other industry-standard SaaS applications
  - Industry-standard Single Sign On (SSO) tools
- Cybersecurity and antivirus management
- New user onboarding and provisioning (and exiting team member deprovisioning)
- Providing 24/7 ad-hoc support

## **Our team**

### Henry Desai

Managing Director at VX Dynamic, specializes in optimizing strategies, operations, and workforces for businesses of all sizes. With a background in technology and consulting, he brings a wealth of experience in software engineering, cloud infrastructure, and senior leadership. Henry holds degrees in Industrial Engineering and Engineering Management from Northeastern University.

### Paolo Gutierrez

Director of V Development and Chief Information Officer at Valens Research, leads a team of software engineers and IT specialists in developing custom information solutions. With over a decade of experience as a Microsoft Certified Application Developer, he excels in designing, implementing, and optimizing software solutions. Paolo, holding a Bachelor's degree in Business Administration from De La Salle University, also brings internet marketing and online business development expertise from consulting for international clients. He is an alumnus of the Basic Management Program at the Asian Institute of Management.

### Mark Ramirez

Chief Accountant at Valens Research, contributes to timely decision-making by providing essential financial statements to management. His professional growth at Crowe Horwath International - Philippines equipped him with practical experience in International Accounting Standards, Financial Reporting Standards, and International Standards on Auditing. Mark is well-versed in Philippine Taxation, with expertise in individual and corporate taxation, Value Added Taxes, Withholding Taxes, and Income Taxes. His industry exposure spans manufacturing, retail, services, law firms, real estate, condominium corporations, homeowners' associations, and religious and educational institutions.
